WORK EXPERIENCE

SOFTWARE ENGINEER

Article | May 2021-Feb 2024

- Developed website features using Vue to enhance overall UX and drive revenue growth.
- Liaised with designers, product managers, and the wider eCommerce team on design and product releases.
- Created a cross-sell component that helped generate \$30k in sales within the first month of implementation.
- Led a performance optimization initiative to implement strategic improvements and achieved measurable enhancements in loading times and overall UX.
- Added manual merchandising capability, enabling the team to identify featured products in Contentful CMS, and promote those products using Algolia.
- Contributed to the development of React-based extension apps for Contentful.
- Utilized GraphQL for efficient data querying, enhancing system communication
- Led monthly meetings to discuss industry trends including PWAs, Micro Frontends, and Wasm.
- Identified and repaired critical software bugs.

SOFTWARE ENGINEER

SpareRoom | Oct 2019-Oct 2020

- Contributed to the development and extension of RESTful APIs using TDD in Perl.
- Worked on both the front-end and back-end for the in-house admin tool.
- Used MySQL to gather data and craft custom, reusable reports and mailshot criteria.
- Supported new payment processing systems project using the Stripe API.
